

Installing UO Library Printers on your Laptop (Windows)

This example uses the Knight ITC BW (black and white) printer located on the second floor of the Knight Library. These instructions can be used with other library printers by substituting the appropriate printer and queue information.

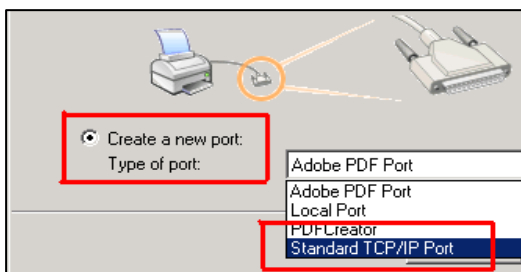

1) Go to the Printers and Faxes Control Panel and choose “Add a Printer”:

2) Choose to add a local printer. Hit Next:

3) Choose “Create a new port”, and select “Standard TCP/IP Port”. Hit Next:

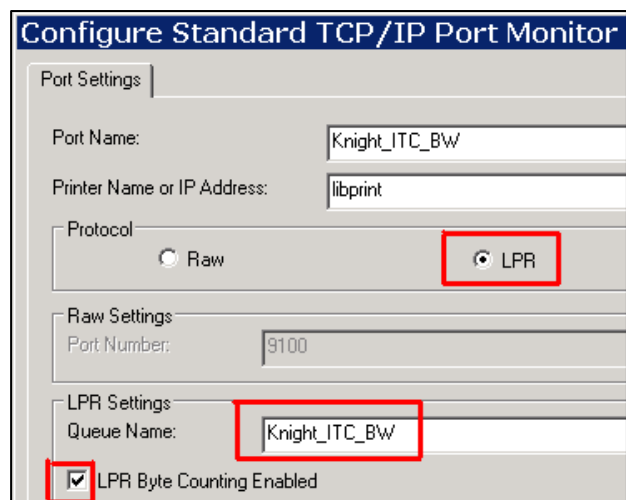

4) Enter a Printer Name of “libprint” and an appropriate port name (“Knight_ITC_BW” in this case). Hit Next:

5) Select the Custom option, and Settings:

6) Select “LPR” as Protocol, and Enable LPR Byte Counting. Enter the correct Queue Name (“Knight_ITC_BW” in this case). Press OK, Next, and Finish.

7) Select the printer driver. You can get a list of printers in the table below. Built in drivers can be used or drivers can be obtained from libweb.uoregon.edu/ec/itc/files/. In this example we have used the Dell 5310n PS driver.

Other University of Oregon Library Printers

All the University of Oregon Libraries have printers accessible through the **libprint** print server available for faculty and students. These printers can be configured by using the appropriate queue name and printer type. The following settings are used in the ITC Libraries.

Library	Queue Name	Color	Printer type
Knight ITC Lab 2 nd floor	Knight_ITC_BW	BW	Dell 5310n
Knight ITC Lab 2 nd floor	Knight_ITC_Color	Color	HP 4650 PCL6
Knight Reference 1 st floor	Reference_BW	BW	HP 4350 PCL6
Knight Reference 1 st floor	Reference_Color	Color	Dell 5110cn
Science ITC	Science_BW	BW	HP 4200 PCL6
Science ITC	Science_Color	Color	HP 4550 PCL
AAA ITC (Arts/Architecture)	AAA_BW	BW	HP 4350n
AAA ITC (Arts/Architecture)	AAA_Color	Color	HP 4500 PCL
Math (Fenton Hall)	Math	BW	HP ???
Knight Music 3 rd floor	Music	BW	HP 2430 dtn

You can use these instructions to install any printer by substituting the queue name and printer type as appropriate. Please contact the Knight Information Technology Center Help Desk for additional information. Law library printers are managed separately see <http://lawlibrary.uoregon.edu> for more information.

Duplex printing

If duplex printing (using both sides of the page) is desired you should use the manufacture's printer driver (as shown in the table) and select "duplexer installed" under Printer → Properties → Device Settings. If duplexing is not desired the generic postscript driver will work for Knight ITC, Knight Reference and Science printers.
